

# Spectrum

Fabric softener and sour

## Features & Benefits

- In one operation, Spectrum provides alkalinity control and imparts a luxurious softness and feel to fabrics.
- Spectrum conditions the surface of all fibres; the textile fibres are lubricated, thereby reducing the tendency of washed items to tangle and crease.
- Prevents yellowing and gall marks on fabric and rollers.
- The proper use of Spectrum reduces the number of rinse cycles per load thus saving water and increasing production throughput.
- Spectrum maintains washing machines clean and free from water scale and lime soap contamination.

## Use Directions

In the final rinse cycle, add 100 mL of Spectrum per 50 kilo load.

## Environmental Statement

SPECTRUM is inherently biodegradable

SPECTRUM can be used with dispensing equipment for portion control

SPECTRUM is water saving

SPECTRUM is labour/energy saving

SPECTRUM is chlorine free

SPECTRUM uses recyclable packaging

SPECTRUM uses waste reduction packaging

SPECTRUM is VOC free
