

Laundrette

Laundry powder

Description

Laundrette is manufactured especially for users who require an effective laundry powder at a moderate price.

Features and Benefits

- Economic product with a delightful Lemon fragrance.
- Free flowing and dust free. Laundrette can be used in coin-operated dispensers.
- Laundrette has controlled foam and may be used in front loading and top loading machines.
- Excellent cleaning performance on both natural and synthetic fibres Laundrette should not be used to launder woollens.
- Biodegradable product, which works effectively in all water conditions.
- Does not contain soap and machines do not become coated in unsightly scum.

Use Directions

Domestic Washing Machine:

Use half to one scoop (50 to 100 grams) per average domestic top loading machine.
Front loading machines require half a scoop per load.

Commercial Machine:

Use at 1 – 4 scoops per 50kg load depending on the degree of soiling.

Ensure that Laundrette powder is fully dissolved. Be careful not to overload the machines as it results in poor washing. Laundrette works in both cold and hot water but best results are obtained if warm water is used. Wool garments should not be washed in Laundrette.
